Subject: Dimock - Data Entry Question

Stephanie,

We are encountering data which on the COC indicate a DW or GW as the matrix. I assume the DW stands for Drinking Water and the GW stands for Ground Water (i.e. monitoring wells). Please see last page of the attached document. I know before you had noted that you had wanted us to only input drinking water data. Do you want the GW data inputted into the spreadsheets?

Also, we are encountering sample results for dissolved metals. If we don't note that the particular parameter result is a dissolved metals value, then that info will be lost. Currently there is no field to capture that info. We have been putting it in the comment field. Do we want to consider adding another field to capture that or do you want us to continue entering it into the comment field?

Thanks,

Suddha Graves
